

Abstract

The invention relates to a single-piece sealing cover 1, made of plastic, especially for sealing an opening 2 in a support 3, comprising a basic body 5, which is joined with a circumferential collar 8, which is designed in the shape of a U, with an inner leg 10, an intermediate region 12 and an outer leg 14, and with at least one stop connection 16 at the outer leg 14.

It is characterized in that the outer leg 14 and the basic body 8 can be locked together by means of the stop connection 16, after pre-assembly V, by insertion into the opening 2 and after final assembly E and that an outer collar 24 and the disk-shaped basic body 5 extend in parallel after final assembly E.

The principal drawing is Figure 2.
